

AI-Powered R&D Tax & IP Intelligence

NZ | Australia | Singapore | UK | Ireland | Canada | USA

\$50B+ in R&D tax credits
go unclaimed annually

Only ~18% of eligible companies claim – despite “free money” on the table

Complex

Multi-jurisdiction rules

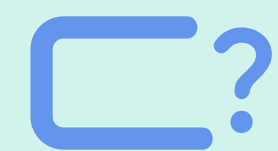

Time-consuming

Manual processes
(4–8 weeks)

Expensive

Consultants (\$5K–\$20K upfront
+ 15–25% success fees)

Opaque

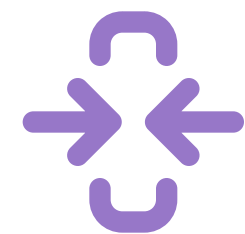

Eligibility, founders often
don't know they qualify

Status quo

Companies only know
claim size at year-end,
essentially flying blind

\$21B+

annual addressable market
across 7 countries

Governments want uptake to rise,
but accessibility remains the bottleneck

Startups & SMEs desperate for cash runway

Only <20% penetration today = **huge whitespace**

Radley/ can unlock **new claims, not just existing ones**

Repo-First AI for R&D Tax

Connects to real data
(GitHub, Jira, Xero, payroll, etc.)

AI classification
→ identifies qualifying R&D activities

Smart documentation
→ generates audit-ready reports

Multi-jurisdiction engines
→ optimized for 7 countries simultaneously

30 minutes
→ claim + supporting docs, instead of 8 weeks+ consultants

Monthly claim tracking
→ companies always know where they stand

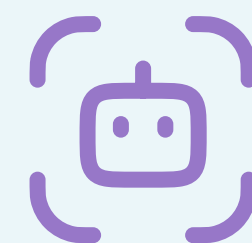

Why now?

Governments doubling
down on **R&D
incentives** post-COVID

Founders chasing **cash
efficiency** in high-cost
environment

AI + APIs now make
automation feasible
(previously impossible)

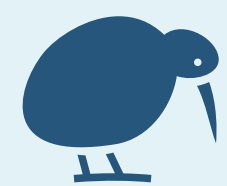

Regulatory **tech adoption
accelerating**
(payroll → accounting → tax)

R/.

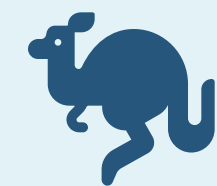

Huge Market Opportunity

Radley.

NZ

15% RDTI only
~1,800 claimants vs
~3,000 expected

Australia

43.5% refundable offset;
12k+ companies,
A\$11.2B spend

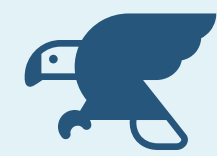

UK

65k claims worth
£7.5B penetration
still only ~50%

Canada

20k+ claimants;
\$2.8B in SR&ED
annually

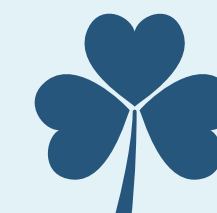

US

8.4B federal credits
+ billions state-level
<20% SMEs claim

Singapore

400% super-deduction
on S\$400k

Ireland

35% federal
refundable credit

Total market

\$21B+
across 7 countries

First mover advantages

Traditional

Big Four + boutiques

Manual, costly, slow, 4–8 weeks

Tech-enabled services

Boast.ai, TaxTaker

Reduce effort but still human-in-the-loop

Radley.

Fully automated repo-first AI

Immutable audit trails
for compliance

Vanta-style assurance: optional partner accountants in lower-cost jurisdictions provide additional sign-off for those who want it cheaper, faster, more credible

Multi-jurisdiction from day one

Continuous visibility
(monthly status updates)

Expansion into IP & IAS38 = new category
(R&D + IP Intelligence)

AI-enabled tax return

Founder Dashboard

claim status, eligibility, documentation

Evidence Engine

capture proof in real-time

Automated Claim Builder

AI-generated audit-ready docs

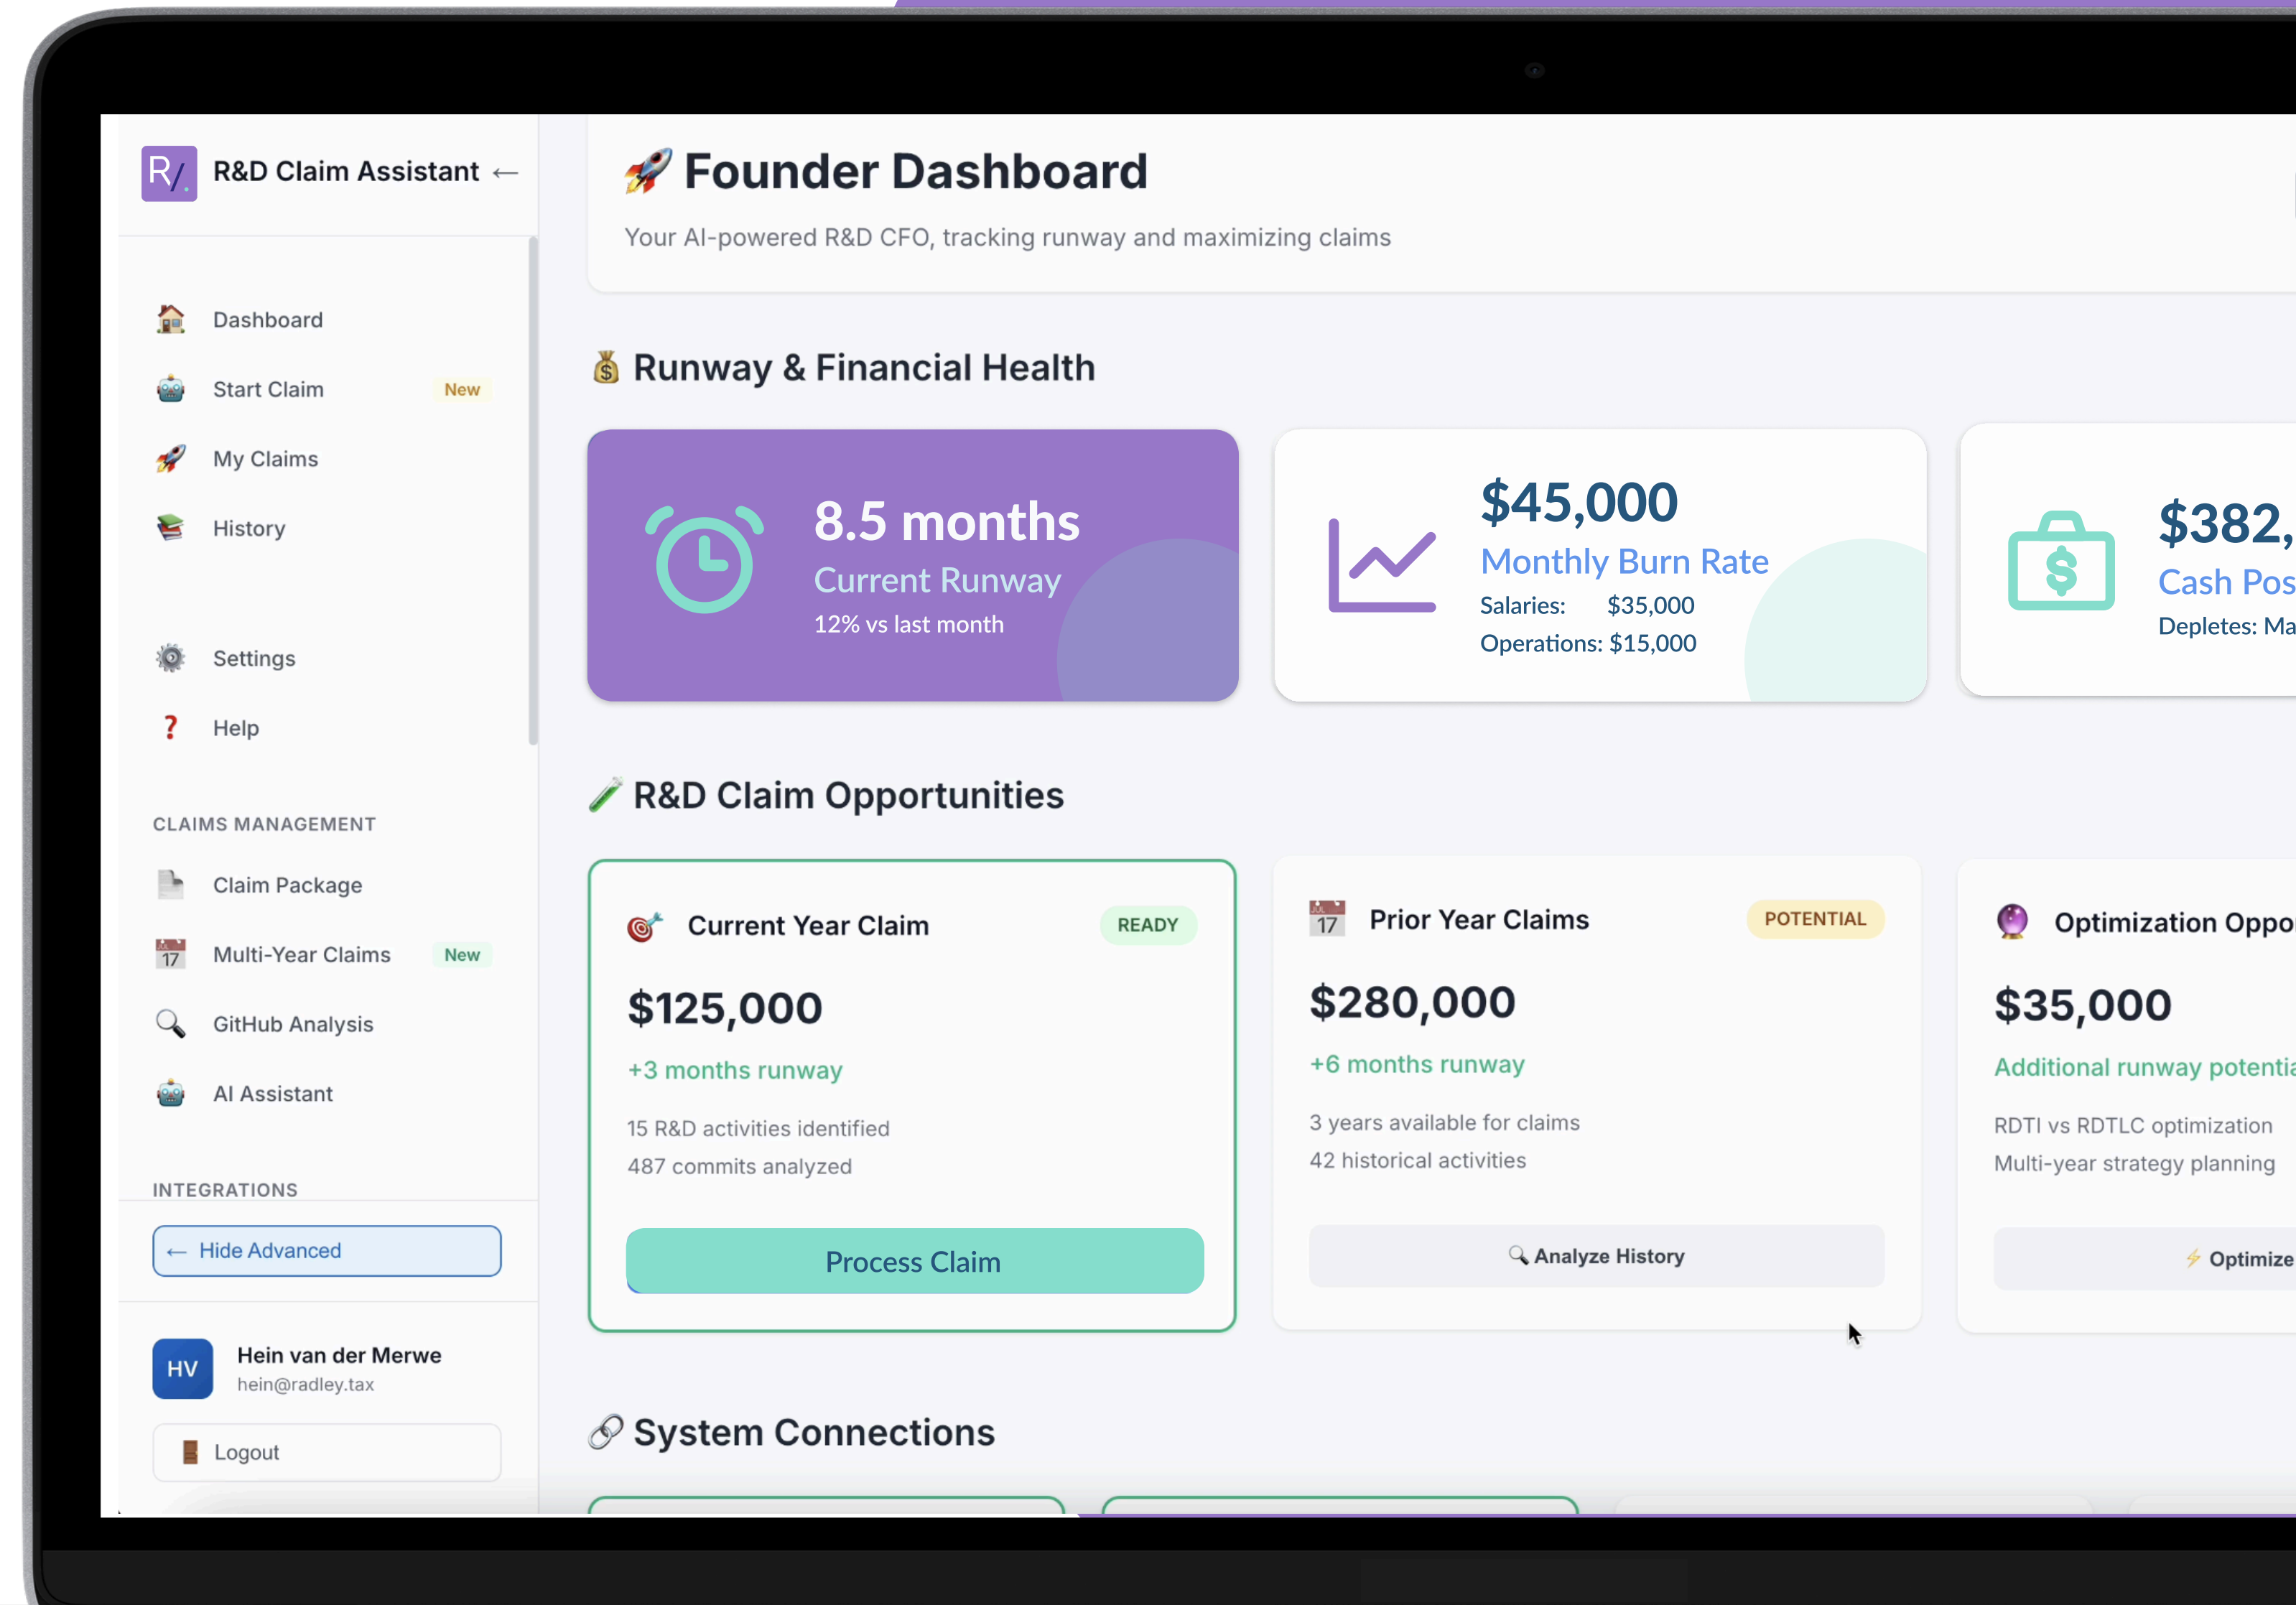

Partner Portal

accountants manage 25–500 clients with white-label

IP Intelligence

monthly valuations, IAS38 compliance, M&A readiness

Radley.

Scalable & Profitable Business Model

Radley.

	SaaS			Partner
	Startup tier	Growth tier	Enterprise tier	White-label for accounting firms (15–25% rev share)
	\$299 /month	\$599 /month	\$1,299 /month	
	R&D optimization ✓	IP intelligence ✓	Multi-portfolio ✓	Unit Economics 85%+ gross margins LTV \$8K–\$45K

Low Friction Go-To-Market Approach

Startups/SMEs

via incubators, accelerators,
VC networks.

Partners

accountants/advisors →
10x efficiency via Radley.

Education

awareness via webinars,
SEO, deadlines.

Expansion

NZ & AU beachhead
→ UK, Canada, US.

Radley.

Use of Funds:

Runway

12-18 months
(including R&D funding)

Multiple Exit Pathways

/ \$50B+ global R&D compliance market.

/ Active acquirers: Xero, IRIS, Avalara,
Big Four or Private Equity exit.

/ Target exit: US\$200 - 300M valuation at
10-15 × ARR (targeted timeframe 3-5 years).

Free Money, Without the Pain

AI-powered R&D tax automation
that unlocks billions in innovation funding

Appendix: Jurisdiction Detail

New Zealand

- **15% refundable tax credit** for eligible R&D spend.
- Uptake: ~1,800 claimants vs ~3,000 expected.
- Challenges: strict eligibility, onerous pre-approval, software R&D often excluded.

Radley Automate documentation, ensure compliance, ongoing tracking.

Appendix: Jurisdiction Detail

Australia

- **43.5% refundable offset** for SMEs (<A\$20m turnover).
- Uptake: ~12k claimants; A\$11.2B in claims.
- Simpler rules than NZ, but still time-consuming.

Radley/. Cut 4–6 weeks to minutes;
continuous compliance.

Appendix: Jurisdiction Detail

Singapore

- 400% super-deduction on S\$400k spend (~68% benefit) + cash payout option.
- Uptake low (~520 claimants), despite generous scheme.

Radley Simplify eligibility, automate filing,
capture untapped credits.

Appendix: Jurisdiction Detail

United Kingdom

- Up to 33% SME benefit,
~65k annual claims worth £7.5B.
- Uptake relatively high, but compliance
tightening and many SMEs still miss out.

Radley/.

AI-generated technical narratives,
audit-ready documentation.

Appendix: Jurisdiction Detail

Ireland

- 25% credit (moving to 30%), effective ~37.5–42.5% benefit.
- ~1,500–1,800 annual claimants; heavy audit environment.

Radley/.

Continuous records
+ IAS38 automation.

Appendix: Jurisdiction Detail

Canada

- 35% federal refundable credit + provincial add-ons (up to 60–70%).
- ~20k annual claimants, C\$3B in credits.
- Documentation burden huge.

Radley/. Automated technical narratives,
integrated audit trails.

Appendix: Jurisdiction Detail

United States

- 10–20% federal credit + 5–15% state credits (up to ~25%).
- ~\$8.4B in federal claims annually, but SMEs under-penetrated (<20%).

Repo-first automation, payroll-offset optimization, audit defense.
